

## Jocelyn Bullock

Hello,

These mega farms are horrific.. have you not seen the footage? Because many still refuse to acknowledge animals as feeling creatures with rights to live free from cruelty I will share. Mother cows are impregnated bu human hands which is disgusting over and over so they get pregnant. Then people drag their newborn calf away while the mother bellows for weeks. They kill the calf often just letting them die in a pile or smashing their heads. Some get to live in a crate to become veal or grow a little to become milk producers. They are beaten even sexually assaulted. Yes it's true. Underpaid workers often vent on these poor animals. The air is terrible and they are loosely regulated. Huge polluters these mega farms are. The air and the ground. All the irons and fecal matter gets spread around to eventually destroy rivers and streams. We should be getting off animal products as they are inhumane and unsustainable. People don't want this. Please do your research. Watch some footage. It's not all about money.

It's a no

Jocelyn Bullock
