

I am writing this letter concerning the expansion of Riverview Dairy, which is about  $2\frac{1}{2}$  miles south of me. I have lived here since 1982.

① The odor from manure.

② Dust from the roads both townships and County.

③ My well water.

④ The increase of lines and hook ups along the ditches (road)

⑤ The movement of cattle - both cows and calves. In state - out state.

⑥ The effect on the land year after year.

⑦ The effect on surface water. There are lots of lakes, sloughs, creeks and rivers in this area.

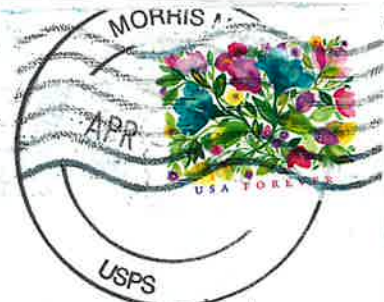

Also protected areas like  
wet lands and waterfowl  
areas. Where does the  
water (tiled or not) run  
into?

⑧ Who keeps track  
of spills, water quality,  
and so forth. Are they  
independent of the  
Dairies??
