

Kimberly Bemis

I am extremely concerned about the run off from the lot entering local water ways. We will need mitigation strategies detailed, emergency plans in case of natural disasters, and continued testing of down stream waterways should this gain approval. The land is not meant to hold nearly 20,000 cattle in such a small area.

I'm also concerned about how they plan to staff their facilities. As I understand, labor has been difficult to obtain and the rumors indicate Riverview uses undocumented workers to fill their ranks. A detailed examination of their payroll should also be taken before allowing such an expansion project as well, though I'm sure that falls to a different department.
