

## Liza Eng

I am deeply concerned over the proposed expansion of West River Dairy operations. I respectfully ask that you preform an Environmental Impact Statement on this dairy expansion. The dairy expansion is massive and that alone should trigger an EIS. The location of this dairy operation needs to be studied. It is within a short distance from several important protected waterfowl areas. Also, a river is also close to the expansion site. What will happen to those places if a leak from the ponds holding cattle waste would occur? Those stated areas will be ruined. There will be tremendous amounts of water used by this operation and all of our small town farmers will suffer from this huge dairy farm.
