

## Richard and Catherine Tate

My wife and I are investors in Riverview Dairy for the past 20 plus years. Based on my observations they are professional, have a high level of integrity, and environmental responsibility. Their facilities are well maintained, clean, and organized. They are committed to doing things the right way, including manure management. They are a strong community partner, supporting farmers, creating jobs, maintaining roads, and investing in schools and local programs. In closing, we respectfully encourage the appropriate agencies to approve the West River Dairy expansion. This project supports local agriculture, strengthens rural communities, and reflects a responsible approach to environmental stewardship.
