

## Terry Maloney

This will affect everything and everyone in the area. It will suck the life out of the surrounding area where they get their water from and drain their manure to. Maybe not right away but when it does, it will be too late! They're big enough, there's no need to get bigger. They only want to fill their pockets. They have no regard for the community. LEAVE OUR COMMUNITY ALONE!! It's perfect the way it is right now and so is Riverview there's no need for it to get bigger! Who's this going to benefit...Riverview and only Riverview...Ugh.....
