

Taylor Gramm

Dear MPCA,

I have lived in Hancock, MN area for 40 years, and worked in the Ag world for 25 years. The Riverview system has been a huge benefit to our community by bringing in talented individuals, innovation to area farming and area businesses, and overall is very positive to our communities.

It is impressive to see their awareness in environmental situations, and we have witnessed their careful approach to many processes including manure application, diligence in road protection during harvest, and they are quick to respond when the need arises. I appreciate their efforts in neighbor relations also.

Riverview is a true leader in the ag world on safety, cleanliness, and best practices.

I believe the West River expansion would be of great value to our area by adding value to farm ground and many more opportunities for area people to stay local.

Thanks, Taylor Gramm
