

## Mark Kaelke

Riverview LLP's proposed expansion of operations at the West River Dairy should receive the highest level of review possible, by both MPCA and DNR, to assure their activities will not negatively impact the quality or quantity of nearby surface waters, aquifers, wildlife, vegetation, soils, and people. Permits for this expansion should not be issued unless negative impacts to these resources can be avoided and Riverview should be required to monetarily insure against spills and other accidents which may occur as a result of their operations.
