

## Sam Visser

My name is Sam Visser and I am an employee of a family owned excavation company. Riverview has helped our business grow and taught us new ways to achieve our goals. Anytime we are on the farm you can always guarantee two things great attitudes from all the employees and a super clean work environment. So our company never has a problem with going to help them out with what ever is needed.

I feel that Riverview also has a big impact to the surrounding communities. The farmers have an opportunity to sell their crops locally right to the dairy which saves on trucking and on guessing what the markets are going to do. They have apartments in small towns that brings new customers into small businesses. They have even taken on high school students as interns who might be interested in doing something in that career field!

Riverview has brought so much growth and opportunity into our community and we are grateful for that.
