

Ann Williams

As a citizen of Morris, I tried to attend the public meeting this past Tuesday and was denied entry because the space had reached capacity. I am strongly against allowing this expansion. I have read articles about the depleted water wells in other states which allowed dairy expansions. The water use is not sustainable. What happens to all the bull calves born? I have watched video of them being shot dead and dumped like garbage. My husband and I operated a family run dairy in Kandiyohi County in the early 80"s. Cows are not units, but living creatures. Riverview run by Apostolic Christians is run by greed and little regard for nature or other people. Please deny this expansion.
