

## Rachel Johnson

I live in Stevens County MN, the same county as the proposed Riverview Dairy expansion, and I am requesting that the MPCA require a full Environmental Impact Statement before the project moves forward. The proposed expansion is significant and it seems only reasonable to expect a full Environmental Impact Statement. While I am happy that Riverview, an important part of our community in Stevens County, wants to invest in an expansion here, I do think it is necessary to require a full Environmental Impact Statement.
