

Mike Bieniek

Please, Do Not let this happen:

Massive water use: Riverview would pump up to 226 million gallons/year from an off-site well—nearly as much as the entire City of Morris (permitted for 300 million gallons/year for 5,000+ residents).

Huge waste output: The facility would generate about 202.7 million gallons of liquid manure and wastewater annually, plus 26,400 tons of solid manure.

Unknown groundwater impacts: The DNR hasn't begun the hydrologic survey or completed the County Geologic Atlas for Stevens County, so aquifers and groundwater resources aren't mapped—making it risky to permit large withdrawals now.

Thank you for your attention,

Mike Bieniek
