

Anthony Anker

I am writing to support the West River expansion and urge the approval of the permit without the need of the EIS. Riverview consistently does the right thing in all parts of their operation. They are clean, consistent, careful, and considerate of neighbors. They have proven track record of following the state permits that they already have received. Requiring another study for this permit is unnecessary as they continue to follow all the rules. I am proud to live near a Riverview site as they make good neighbors and are good for our community.
