

Kara Lundin

I oppose this expansion because it is an extreme environmental hazard, puts public health at risk, increases the elimination of family farms, and I do not support the poor animal welfare that happens at these large farms. This is not how we should be operating dairy farms. It is inhumane and disgusting. I will not purchase food for my family from dairy industries like this. Our water and our treatment of the life that sustains us should be priority. I strongly oppose the West River Dairy Expansion and would be deeply disappointed if the MP A provided a permit for this facility.
