

Connie Roche

I am from Winona and was very aware of the Daley Farm request from Lewiston, MN to increase their dairy expansion. On the same vein, I believe this request would have a great impact not only on local farms but also the great possibility of manure run-off and contamination of groundwater and wells.

Having worked as a Public Health Nurse in Winona County, such a huge operation has health risks for the general population specifically that of bird flu and swine flu.

Treasuring our lakes in the state should be a high priority for all and contamination of our lakes and streams is not a route that we want to take.
