

I am a lifelong resident of Stevens County, and I am writing to express my full support for the West River Dairy expansion.

I am a local farmer and have had the opportunity to work with Riverview through silage production and other farm-related work. Riverview has consistently been a positive and reliable partner. Each dairy provides silage and forage opportunities that support local farming operations like mine, allowing me and other neighboring farms to remain productive, especially during the off-season. Riverview also creates opportunities for many other local businesses, helping strengthen the economy in the areas where they operate.

Riverview is required to follow strict manure application standards, and they take those responsibilities seriously. Manure application is carefully managed and based on crop needs and soil conditions, while following regulations designed to protect land, water, and the environment.

Riverview's sites are clean and well maintained, and their employees are respectful and easy to work with. Communication has always been strong, and they make sure operations are handled responsibly.

I fully support the West River Dairy expansion and believe Riverview will continue to be responsible stewards of the land and the communities where they operate. This expansion will provide ongoing benefits to local farmers and the surrounding community.

Thank you,

Tyler Solvie
