

Gwendolyn Fassett

This Riverview-proposed expansion of West River Dairy MUST have an EIS before it goes any further. It would be the largest CAFO in the state, when we should be moving rapidly away from CAFOs toward more sustainable forms of agriculture. We can't afford the amount of water it would require, let alone the potential for pollution of the water and land around it! Please do a thorough study, not a performative one! Thank you!
