

## Mitch Koehl

I have lived in Stevens County 46 years. I have farmed here for over 20 years. I currently live less than 1 mile from one of Riverview's existing dairy sites. Riverview has been very respectful of their neighbors. The gravel road I live on is better today than when the dairy was first built due to Riverview adding gravel to repair any damage that may have been caused by harvest operations. They have also provided us opportunities that would have never been available to us without their presence in our county. These opportunities include added value to the sale of our crops, manure which has added value to our land, and job opportunities for us and our kids assisting with harvest operations. I support the West River Expansion project as it will add value to additional acres in this region and provide opportunity to future generations.

Thank You,

Mitch Koehl
