Dear Charles Peterson and the Minnesota Pollution Control Agency,

I write to you today to share I do not support the expansion of the West River Dairy CAFO Operation. I am concerned of the irreversible impact huge dairies like this place on our natural resources.

I have worked on a farm, previously lived in a rural town, and have learned about the impact of CAFO's. I have even worked in dairy manufacturing in Wisconsin and understand the importance of the dairy industry, but supporting such huge corporations like this is not beneficial to the local economy or environment in the long-term.

Please do not allow such a big operation to push their weight around and exceed current animal unit limits.

Thank you for considering the implications of a CAFO of this magnitude.

Kindly,  
Amy Flatten
