

Lisa A

Please call for an environmental impact study. As an agency that is called to control pollution, you must take this seriously and do what is required of you. Lives are at stake. Water pollution is at risk so is methane pollution. Factory farming is often cruel besides. Do your jobs please and consider the pros and cons in terms of who benefits and who suffers from rushing this through. How will this affect Minnesotans quality of life? How will it harm us? How will it affect the environment? How will it benefit? How will it harm? Think 7 generations. Be smart, have a heart
