

## Kurtis Wulf

To whom it may concern,

I am a neighbor who lives and farms in the area around the West River Dairy. Each interaction that I have had with Riverview has been filled with integrity and a genuine concern for my well being as well as a desire to care for the environment. With this in mind and the extensive permitting process set forth by the state, I support the expansion of the West River Dairy. I welcome more growth in our community! As a local school board member I am excited for the potential to increase our enrollment with this project. I have had a front row seat watching operations of West River Dairy since its inception and have always been impressed with the courtesy of employees and owners alike. Riverview also uses best practices when it comes to manure application, dust suppression and other duties associated with running a dairy farm. I encourage MPCA to approve this permit and allow growth in my community!

Thank you, Kurt
