

## Greg Reuter

I am grateful to have Riverview as part of our community. I support this project because they are an outstanding company that cares for people, animals, and the environment. The manure produced will replace commercial fertilizer—reducing the need for imported products—while helping grow future crops and improve soil health. In addition, it will give area farmers the opportunity to sell their crops for local use rather than shipping them long distances. This project is a great opportunity for our community and will not have a negative impact on the environment.
