

## Charles Koehl

To whom it may concern, my name is Charlie, and I have been in Horton Township for 20 years. I live within 6 miles of West River Dairy.

I have had numerous interactions with the West River Dairy Farm, and so far, they have all been positive. It is a well-supported fact throughout the nearby community that Riverview is a highly professional and community/environmentally conscious organization. The manure from the dairy has made an immensely positive impact on the soil health and erosion control in our region. The crop feeds the cows, and the cows feed the crops through manure; it's a simple yet regenerative system.

I understand the concern some may have regarding this expansion; however, I believe West River Dairy has, and will continue to hold environmental sustainability in the highest priority. Based on my observations from previous Riverview expansion projects, this WRD expansion is likely to bolster the rural community and provide environmentally sustainable solutions for future generations.

I approve the West River Dairy expansion.

Sincerely, Charlie
