

Megan O'Hara

This MEGA dairy operation will seriously impact water quality across the region. Water is a commonly held resource, critical for life and health, and it doesn't respect county or municipal boundaries. Minnesota is made of water and we cannot keep exploiting it. Please respect the rights of other dairy farmers, the health and welfare of children and families and the water quality of Minnesota. Riverview is simply too large an operation for the land and water to support and for the health of residents throughout the state!
