

Ramona Heitmann

I am strongly opposed to the expansion of Riverview Dairy. The operation is already large and has caused problems with both groundwater extraction beyond what the current wells can handle sustainably and the waste generated also has caused issues. The other wells in the area are at risk due to overuse.

The air pollution caused by an expansion is also problematic. Such a large operation is not conducive to animal welfare nor human health. I strongly encourage the MPCA to deny the application for expansion.
