

## Gwendolyn Fassett

This CAFO proposal needs an environmental review, a SERIOUS environmental review! Almost twice the number of cows as the current largest operation in the state? As much water as the city of Morris? I don't know why we're even considering this proposal -- CAFOs are terrible for the animals, terrible for the neighbors, terrible for small farmers, and terrible for the environment. At the very least, this proposal should not move forward without a strict environmental review and regular, thorough inspections to ensure that their 250 million gallon waste storage (!!!) is not leaking. Actually, don't bother with the review -- just do the right thing and deny this proposal! Thank you.
