Mr. Peterson,

I support the expansion of Riverviews West River site.

I have farmed around and worked with Riverview for 25 years, have seen the benefits to the community and surrounding farms, helping keep both vibrant and alive.

This process is to be fact and performance based and not emotional, and if this process does not remain as such, it will have a devastating impact on dairy's of all size in Minnesota! And the entire state will feel the repercussions.

Therefore, I believe the current review process is sufficient and that additional regulatory steps, such as a requirement for an environmental impact statement (EIS), are unnecessary.

Thank you

Nathan Collins
