

Leona Hanson

Huge animal confinement of any kind has gotten way out of control. It's unhealthy for the animals, the environment and humans. The stench in the air most days is unbearable if you live within a short distance of these farms or buildings. It's disgusting and should have never been allowed in the 1st place. We also need to get rid of all farmers on country boards. I've found from experience that they don't care about the environment period. They don't even follow their own rules. It's all about money. As long as they don't have to put up with the smell or the destruction of the environment next to them they give the permit to the mega farmer. I'm sick of it.
