

Mary Zink

We are very alarmed by the idea that Minnesota would harbor a massive dairy CAFO. The ecological impacts are many and serious; but the socio-economic impacts are also great. Minnesota is already losing dozens of dairy farms annually due to inconsistent and often below cost-of-production milk prices. Massive dairy operations will glut the market and allow them to push small and medium-sized family farms out of business and off the land. Minnesota is already losing family farms and allowing this CAFO operation will only accelerate the loss of dairy farms in our state, decimating Main Street economies in the process.

Please support the environment, family farms and Main Streets throughout our state and say NO! to CAFO operations

Thank you for your consideration
