

Holly Grap

Riverview does not have Minneostans in mind for this expansion. They do no support community farmers, and this expansion is an ecological disaster waiting to happen. Riverview has already had manure leakage in a manure storage tank, and their hog and dairy farms use at least 570 million gallons of water annually. The proposed expansion would pump and store up to an additional 226 million gallons. We do not need to sacrifice our fresh water for these massive factories. Please vote no. For our water. For our future.
