

Mitch Koehl

I support the West River Dairy expansion. I feel the MPCA has done sufficient work with the EAW and no EIS is needed. Riverview has a proven track record of proper manure management. I have lived within less than 1 mile of one of their existing dairies for over 17 years and there has never been any issues causing environmental concerns. Their manure is a preferred source of fertilizer for our crops. They have provided a huge benefit to our region.
