

Mark Klinski

Being from SE MN , where smaller dairy farms ,less than 200 cows , are usual , we need some common

sense in regulations to control Massive CAFOs , flooding the milk market & running other farmers out of Business, Truckers also , & regional Processors all declining, In my opinion there is No Way the Manure can be managed from this size of operation ,without detrimental effects to Roads , Neighborhoods & Land ,& Environment

We need to exercise Caution On these concerns , WE do not Need this ,Just because a Conglomerate wants to Take Over more Markets, Thank You , Mark
