

Amber Ramey

An expansion of this size needs considerable investigation on the impact to the people of Morris before it is allowed. I am very concerned about the amount of water it will use and pollution it will create. I am also very disappointed in the way Riverview has tried to throw its weight around and silence people living in Morris. They had their employees pack the meeting tonight over an hour before the start time. They want to make sure no one can express concern. It really makes me wonder what else they are hiding or pushing through. This is an over reach of power and deserves to be investigated fully before proceeding.
