

3/12/26

Dear MPCA,

I have lived within a ¼ of mile of another Stevens County Riverview dairy for the last 10 years. In that time, we've had no water quality or supply issues with our well. Riverview excels in neighbor relations, maintaining & dust control on roads, resolving concerns promptly, and minimizing odor.

My experience in the dairy industry is that Riverview is top-tier in cleanliness and site upkeep.. Dairy manure not only sustains soil health but also helps retain carbon locally, a natural and sustainable approach to helping the environment. I feel that Riverview adds a lot to our community which has provided opportunity for that next generation to live in this area.

I encourage the MPCA to prioritize feedback from those of us living near these operations, not from those afar. I support the West River Dairy Expansion in Stevens County.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tyler Scott', written over a light blue horizontal line.
