

## Sally Summer

MPCA

Riverview LLP is proposing to expand in Steven's county. (West River Dairy Expansion) I am a land owner 15 miles away from this CAFO.

It is important to study the impact of this expansion and requires an EIS.

We who own land know that pollution from these CAFO are impacting our ground water, our land health ,our communities. The Pomme de Terre River watershed is within25 miles from its confluence with the Mn River for example. Plus the Minnesota Department of Natural Resources does not have a complete map of Steven's County groundwater resources and aquifers.

Accountability is the job of MPCA. Do not allow this expansion based on unknowns.

EIS needs to be completed before expansion.

Sincerely

Sally Summer

Land owner in Big Stone County.
