

# Ford Thunderbird

EIS must be done. Be only fair to everyone. Why are the riverview supporters so afraid of seeing an EIS done?

It's just 1-2 big wigs who wanted these dairies in each area. Vast majority of everyone else living in them areas don't want them to start with.

Riverview is like a mining company. They come into an area and just mine all the resources and once the resources are gone so is riverview. They are off to a new area to mine.

What many people don't know if this goes through this expansion it's just a green light to expand other sites they already own. They want to expand East Dublin dairy south of Murdock to 32,000 cows.

Looks like there is an expansion in the future at the Swenoda site in swift county south of Benson with riverview recently purchasing additional 80 acres on the east side of that site close \$1,400,000.00 million dollars and this late winter.

Speaking of the swenoda site. Many people well most everyone doesn't know about the huge manure spill there in the fall of 2024 that covered 65-70 acres and went into 2 separate drainage ditches a quarter apart and that manure spill was about 2.5 miles away from the Chippewa river and them drainage ditches feed directly into the Chippewa river. They cleaned it up before they reported it to the MPCA and claim it was mainly 50,000-60,000 gallons of mainly water. Very alarming and very concerning. Very disturbing especially for anyone that lives in a 5-6 mile radius of that manure spill. Probably have high nitrate levels in their drinking water from their wells.

When they manure pumping crews are mainly made up of Hispanics and South Africans who's primary language isn't English it's hard to follow rules and directions. Heaven forbid these big wigs from riverview or who are strongly affiliated with riverview get any manure on their shoes or smell like manure.

What a good show riverview put on the night of April 28th. They use a smaller venue in Morris when there are 2-3 other larger venues to use in Morris. They jam it pack with all their supporters and Hispanics who work for them and who are speaking Spanish across the room to each other and one is holding up a sign in Spanish to comment on this site for approval for this expansion. Looks like a 100 plus comments in a couple hours time last night from riverview employees. All them comments should be disregarded.

Riverview does an extremely good job getting one of their supporters and employees on every local government board possible. From township, planning and zoning, rda and school boards and and everything in between. They make sure riverview is taken care of and rest of us non supporting riverview people they make sure our voice isn't heard at all or our comments and concerns are brushed aside.

They claim they do so much for the communities they are by but yet I don't see any them riverview supporters or Riverview employees on the volunteer fire department or on the EMT. Oh wait they aren't getting paid for that and no need to protect riverview's interest on them rural volunteer positions.

It will be a good day in rural Minnesota when riverview and their businesse partners are no longer in business and are broke because that is what they are trying to do everyone else in rural Minnesota now who doesn't want anything to do with them.
