

James Morais

living in Nashua Minnesota close to 2 Riverview Dairy's I never have any smells or water problems in fact they as a company always help the community, and with the dairy's there the community thrives. More work opportunity and the community grows.

Dairy's have a great way in bring community together and ensuring work opportunity. Over the past few years there was and is still no issues regarding water problems I am all for the dairy's as they are a great construction to the community.
