I strongly support moving forward with the expansion of the west river dairy. I live 1 mile away from the d45 dairy, Riverview is very capable of handling this expansion in professional manner they take care of the manure according to mpca rules and dont cut corners. Riverview is a benefit to rural economy's providing farmers with high quality fertilizer and a better basis for corn.

A EIS is not necessary for this project Riverview wants the best for the environment and neighbors. Please move forward with the project I support.
