

## Nathan Koehl

My name is Nathan Koehl and I have lived in the area surrounding existing sites for most of my life. We have never noticed any changes or negative impacts on our well water quality or quantity. We also have worked closely with sites in our area for manure application. The application is always carried out responsibly and with utmost care for neighbors and farmers in the area. Soil sampling and monitoring has been diligently followed so that soil and water health are maintained. Manure has helped support us in serving our soil better and has allowed us to raise healthier and more sustainable crops on our ground.

The crews that work with Riverview to harvest their crops are always very respectful and maintain road quality, manage dust properly, and make sure that neighbors and safety are top priorities. As a long-time neighbor to Riverview I encourage the MPCA to approve the expansion permit for West River Dairy.

Thank you.
