

## Janice Nelson

I am very, very concerned about this proposed immense dairy that is being proposed to be located near Morris, Mn. The damage to the environment, including wildlife and waterfowl areas would be extreme and irreversible! The amount of water required would affect the water table in the area and the effects on the Pomme de Terre water shed must be very carefully considered. Environmental effects must be very thoroughly checked and considered!! Also, the effect on small to midsized dairy farms would be unfair and damaging! Please be careful of irreversible outcomes of this decision! Thanks for your consideration. Jan Nelson
