

Jeanne Landkamer

Dear MPCA,

I am very concerned about the expansion of CAFOs in Minnesota. They pollute area waters and make large areas unlivable because of the toxic air quality. They put small producers out of business. They have a record of intimidating and harassing farmers that object to these gigantic operations. For a variety of reasons, I think it is imperative that the MPCA require a full environmental impact statement to assess the dangers posed by the proposal to expand the West River Dairy operations.

Thank you,

Jeanne Landkamer
