

## Greg Solberg

Hi, I can't even come close to imagining the State would allow this proposal to go through without having an environmental impact statement in place. At what point does health (planet, human, animal, etc) come before profits? At what point does the State mandate corporations own their actions? Meaning, they're on the hook for cleaning up the pollution they create that allows them to earn massive profits - not us taxpayers?

Regards,  
Greg Solberg
