

Tom Walsh

To whom it may concern

I have had the opportunity to live very close to several riverview sites and witness first hand all of the activities

Animal care

Environmental stewardship

Neighbor relationships

Community interactions

The list is long and from what I see it's top notch

I am involved with riverview so it might seem like my comments are biased but my family has been in this community for generations and I hope to continue that on to the next so I would never be a part of something that would put that in jeopardy

Since this is an environmental issue as far as the mpca goes I can tell you that having livestock in the area is a good thing for the environment

And many safe guards are in place to insure that

Livestock farms of all sizes are such an important part of our rural communities

Please consider your decisions carefully and understand that we have very good environmental protection rules already in place to protect our great state and rural communities

Thank you for your consideration
