

Taylor Gibson

I have been working with riverview dairy for about 3 years now. The issues that people are having do not know how the company is. The people not only the hired hands but also the vendors (outside resources that maintain operations) are treated with upmost respect. When an issue is presented the issue is delt with accordingly. The cows are treated very well and are very healthy. Not only the day to day operation is great, look at all the other things the dairy brings to the table. Fertilizer for the fields, for farmers its guaranteed place for silage, wheat, straw. For towns it's more money being spent at gas stations, grocery store. There is very little to no smell. Keep up the great work riverview!
