

## Tanna Rens

I could not caution you more to not allow this. These large scale dairy farms are ruining our rural farming community. They (unfortunately) put one up close to our home and it has essentially ruined our once peaceful farm. We can rarely have our windows open due to the horrible smell when they're separating manure. The amount of flies that we have is absolutely disgusting and we can't even enjoy being outdoors. They are pushing every small dairy farm out of business. When is enough enough for them?
