

CARLOS GUTIERREZ

I am a Stevens County resident, and I am in favor of the expansion of West River Dairy. I am familiar with Riverview's farms, and I know they always try to do things the right way. Riverview provides jobs in our area. They also care about protecting the environment and taking care of their neighbors and communities where they operate. West River is a clean farm with manure properly handled and contained. this manure is used on fields near the dairy after silage harvest and following state requirements. I know some guys who help apply manure for Riverview and they have to follow a lot of rules and do inspections. I am not an expert in government and permitting but I know that the state reviews just about every aspect of projects like this. It has been about two years since I first heard about this expansion for Riverview and I believe they've been working on permitting all this time. Please give West River a permit for the expansion.
Thank you
