

## TJ Hennen

I have lived with in 5 miles of the proposed expansion for most of my life. I am not concerned about Riverview as a company itself. I think that they a great asset to our community. However, I am concerned about is the true environmental impact of the proposed expansion. I believe that a full Environmental Impact Statement should be done prior to the expansion. Also, I have noticed that our water quality has gone down in past 15 years. What happens when our well goes dry? Who will pay for that?
