

## Dick Cheney

I fully support the expansion of this facility. I believe in a free market, and it is my belief that this riverview expansion satisfies the requirements of the State pursuant to the clean water act. I believe what river view has done and is doing to advance industry within the State is advantageous to the citizens of the State. I have toured river view facilities in the past. I have never observed anything that would have struck me as deprecative to the resources of the State. I believe in a robust economy, and one of the land uses that fuels that economy in the state of Minnesota is production of commodities like livestock and grains. Minnesota is very protective of its resources via its regulatory environment, any entity that can navigate those regulations is in it for the long haul. I believe river view has and will continue to stand the test of time. I also believe the agents of the state have provided and will continue to provide the most accurate information regarding expansions like river view. The public is stupid and reacts on emotions. I don't believe a company willing to put up funding will jeopardize that by overlooking issues the agents of the state have. I love you.
