

Rose and Dan Murphy

We have the following concerns regarding Riverview's proposed expansion

- an Environmental Impact review of industrial measures must be done

- impact of local water supply—future water supply, safety of water available, especially long term (we are aware of the issues created by Riverview in AZ)

- expansion will likely be a boost to the local economy, but consider how many small dairy farms have been/will be forced to sell out having a negative impact on the local economy

-
