

Bob Lefebvre

I have had the fortune of working with dairy farmers across the Country. The people at Riverview from top to bottom are the best in the industry. Care, integrity and innovation are words that describe the culture. Every person is passionate about producing wholesome food by caring for the animals, environment and their fellow peers. The same care and innovation goes into the planning of their facilities. And, they have an impeccable decades long track record.

The design and planning of the expansion exceeds standards. We also know from experience that the building and operation of the facility will also exceed standards. I urge MPCA to move forward expeditiously.
